Computing	Creating media - Desktop publishing During this unit, learners will become familiar with the terms 'text' and 'images' and understand that they can be used to communicate messages. They will use desktop publishing software and consider careful choices of font size, colour and type to edit and improve premade documents. Learners will be introduced to the terms 'templates', 'orientation', and 'placeholders' and begin to understand how these can support them in making their own template for a magazine front cover. They will start to add text and images to create their own pieces of work using desktop publishing software. Learners will look at a range of page layouts thinking carefully about the purpose of these and evaluate how and why desktop publishing is used in the real world. Key Resources on School 360: <ul style="list-style-type: none"> • Adobe Spark - Allows use across all devices. • J2E has the J25 desktop publishing tool which allows students to save the work electronically but still allow the teacher to view this via the pupils folder. • J2 Data - can be used to create digital charts. • Busy Things - Busy Paint and Publisher tools also available and will work on all devices with an internet connection. Additional suggested activities for starters, plenaries and home learning: BBC Bitesize website - How do Digital images work? BBC Bitesize website - Creating and understanding charts
